DETAILED ACTION

Claim Objections

Claims 14, 16 and 18 are objected to because of the following informalities: In claim 14, line 7, "mounted rotatably mounted" appears to be in error. Please correct. In claim 16, line 7; "centralizer move" should be --centralizer to move--. In claim 18, line 3, no antecedent basis could be found for "the tubular member". Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Anschutz 4505614.

Anschutz discloses an apparatus 10 for centralizing a well tool 12. Tubular body 16 has an axial passage 14. Centralizer 10 is mounted to the tubular body around the passage. The centralizer is moveable between a restricted (fig. 2) and an unrestricted position (fig. 3). Hydraulic piston assemblies 24, 26 urge the centralizer members to the restricted position. Hydraulic pistons are considered springs. Functional limitations like "in response to contact with a well tool" are given limited patentable weight in that the device must be capable of performing the function. Tool 10 is capable of moving towards the unrestricted position by contact with a well tool.

Allowable Subject Matter

Claims 2-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 7-20 are allowed.
